

Welcome to Or-Fin.

Or-Fin is a time-saving software which helps a private household to organize its or their finances.

Or-Fin helps individual users to get an overall picture of their assets, their insurances and their provision for the future.

Or-Fin structures all the user's files.

The software package contains a CD-ROM as well as labels and indexes for files. This allows a quick and clear filing of all documents.

Fundamentally Or-Fin shows the household its financial situation. The finance survey can be stored on the computer as well as printed. The personal finance survey is the ideal basis for a private provision planning. Apart from that all required documents are quickly available in an insurance claim.
